PROFILE

I am a Software Engineer with over 5 years of experience building and maintaining backend systems, frontend applications, and some IoT firmware within the computer software industry. I am skilled in programming languages such as Go and PHP, and I have previously worked with JavaScript, TypeScript, Java, and C/C++. I am eager to continue improving my coding skills as a software/backend engineer. I hold a Bachelor's degree in Computer Information Systems, with a focus on Informatics.

EDUCATION

GORONTALO STATE UNIVERSITY

Bachelor of Computer Information Systems

GPA: 3.35

EXPERIENCE

Backend Engineer (Contract) | PT Digitalks Cendana Solution:

Jan 2023 – Now 2026

- Designed and built the CI/CD using GitHub Actions and integrated with the Kubernetes API.
- Designed and developed a user management service with features for user management (CRUD) and authentication (Golang).
- Designed and developed a payment service that integrates with Indonesian banks such as Mandiri, BRI, BTN, and BNI using the SNAP API Virtual Account (SNAP BI) (Golang, PHP).
- Designed and developed a REST API module related to students' activities (PHP).
- Maintenance Multiple SIAKAD Backend service (Golang, PHP)

Backend Engineer (Full-time) | PT Multidaya Teknologi Nusantara:

Oct 2022 – Feb 2025

- Collaborated with the Product Manager to design and develop the technical part of the product features, including the API Module and database design using Golang.
- Collaborated with the QA team to test the application's features and functionality.
- Collaborated with the Data team to design a table and backfill production data.
- Designed and integrated our application with tools such as Message Broker (RabbitMQ), Postgres Database, and Redis Cache.
- Rewrite an API and a Module for Odoo applications to enhance the performance (Golang, Python).
- Maintained an existing application and created Request for Comment (RFC) and Software Architecture Design (SAD) documents.

Software Engineer (Full-time) | Lamahu Multimedia:

Oct 2018 – Jun 2022

- Design and develop several REST API modules, including authentication and CRUD operations. (Golang)
- Design and implement an application for communicating between IoT devices and web applications using MQTT, WebSocket, and Serial. (Golang)
- Design and implement an internal tool for monitoring services and updating/migrating the existing application. (Golang)
- Develop and integrate the application with Mikrotik Router OS API to manage Mikrotik data. (Golang)
- Design and develop several React components for monitoring IoT devices with NextJS and ReactJS
- Design and develop an IoT firmware for an ESP32 device (C++)
- Maintenance of an existing application and API testing using tools like Postman

Backend Engineer (Contract) | Kominfo Of Bone Bolango:

Aug 2019 – Apr 2020

- Develop several REST API modules for the employee attendance application. (Golang)
- Design and develop modules for mapping the location of public facilities. (PHP)
- Design and implement the COVID-19 web application and REST API. (PHP)
- Maintenance of an existing application and API testing using tools like Postman

Software Engineer (Full-time) | Antar Antar Indonesia:

Nov 2016 – Aug 2017

- Develop and implement the mobile Android application. (Java)
- Design and develop administration applications for managing transactions. (NodeJS, Angular, MYSQL)
- Implement Firebase Database, Push Notification, Firebase Auth SDK In Android App, and Google Maps

Web Developer (Intern) | Kejaksaan Tinggi Gorontalo:

Apr 2016 – Jul 2016

- Design and implement a new website template. (CSS, HTML)
- Develop and implement an administration website and database design. (PHP)

Technologies and Languages

- Go, C++, PHP, Kotlin, JavaScript, Java, Python, SQL, HTML, CSS
- Git, MySQL, PostgreSQL, Firebase Database, Docker, Unix, Linux, Kubernetes.
